

New Rules for an Old Institution: Rethinking the Future of Higher Education

Higher education is facing a crisis. The traditional model of a four-year residential college is increasingly unaffordable, unsustainable, and out of touch with the needs of students.

In *New Rules for an Old Institution*, author Michael Crow argues that we need to rethink the entire system of higher education and develop new models that are more affordable, accessible, and relevant to the 21st century.

Crow, the president of Arizona State University, is one of the most innovative and forward-thinking leaders in higher education. In *New Rules for an Old Institution*, he draws on his own experience to offer a bold vision for the future of higher education.

Crow argues that we need to move away from the traditional model of a four-year residential college and towards a more flexible and personalized system of higher education. He proposes a number of new models, including:

- **Stackable credentials:** Students would be able to earn micro-credentials and stack them together to create a customized degree program.
- **Competency-based education:** Students would be assessed based on their mastery of skills, rather than on their completion of a certain number of courses or credit hours.
- **Online learning:** Online learning would become more widely available and affordable, giving students more flexibility and choice.

Crow also argues that we need to rethink the way we fund higher education. He proposes a number of reforms, including:

- **Increasing federal funding for higher education:** The federal government should provide more funding for higher education, especially for low-income students.
- **Reforming the student loan system:** The student loan system should be reformed to make it more affordable and fair.
- **Encouraging private investment in higher education:** Private investment in higher education should be encouraged, but we need to ensure that this does not lead to a two-tiered system of higher education.

New Rules for an Old Institution is a bold and provocative book that offers a much-needed vision for the future of higher education. Crow's ideas are sure to spark debate, but they are essential reading for anyone who cares about the future of our education system.

About the Author

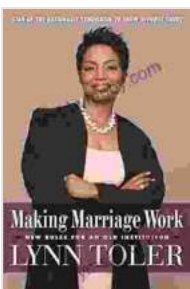

Michael Crow is the president of Arizona State University. He is a leading advocate for innovation in higher education and has been recognized for his work by a number of organizations, including the American Council on Education and the Carnegie Corporation of New York.

Praise for *New Rules for an Old Institution*

"Crow's vision for the future of higher education is bold, provocative, and essential reading for anyone who cares about the future of our education system." — **The New York Times**

"Crow's book is a must-read for anyone who wants to understand the challenges facing higher education and the need for new models of teaching and learning." — **The Washington Post**

"Crow's vision for the future of higher education is inspiring and achievable. *New Rules for an Old Institution* is a roadmap for the future of education." — **Bill Gates**
