The Economics of Satan and the Inflationary State is a groundbreaking book that exposes the hidden forces behind inflation and economic instability. This book is a must-read for anyone who wants to understand the true nature of our economic system and how to fix it.

In this book, author and economist Professor Richard Werner argues that inflation is not simply a natural phenomenon, but rather a deliberate policy created by central banks and governments. He shows how the inflationary state uses fiat currency and fractional reserve banking to create an endless supply of money, which leads to rising prices and economic instability.

## The Hidden Role of Satan

Werner goes a step further than most economists by arguing that the inflationary state is not simply a product of human greed and stupidity, but is actually the work of Satan. He believes that Satan is a real being who is actively working to destroy our economy and enslave us all.

Werner's argument may seem far-fetched at first, but he provides a wealth of evidence to support it. He shows how the inflationary state has been used throughout history to control populations and destroy nations. He also shows how the symbols and rituals of Satanism are often used by central bankers and other financial elites.

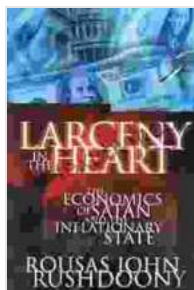

## **The Solution**

Werner does not simply diagnose the problem of inflation; he also offers a solution. He argues that we need to return to a sound money system based on gold and silver. He also believes that we need to abolish central banks and fractional reserve banking.

Werner's solution may seem radical, but it is the only way to truly fix our economic problems. If we want to create a more just and sustainable world, we need to break free from the inflationary state and return to sound money principles.

The Economics of Satan and the Inflationary State is a must-read for anyone who wants to understand the true nature of our economic system and how to fix it. Werner's book is a wake-up call for all of us. We need to wake up to the reality of the inflationary state and take action to stop it. If we do not, we will all suffer the consequences.
